Education

Peking University

PH.D. IN COMPUTER SCIENCE

Beijing, China

Sep. 2020 - Present

- In the Software-hardware Orchestrated ARchitecture (SOAR) group; advisor: Prof. Chenren Xu
- Design a visible light backscatter communication system that supports concurrent transmission for low latency purpose.
- Design a visible light communication system with spike cameras as receivers to achieve high data rate and dynamic range.
- See publications for more research.

Peking University

B.SC. IN COMPUTER SCIENCE

Beijing, China

Sep. 2016 - Jun. 2020

- Graduated with Excellent Graduate Award

Employment

Microsoft Research Asia

RESEARCH INTERN

Shanghai, China

Dec. 2022 - Sep. 2023

- In the Shanghai Wireless Group; mentor: Prof. Lili Qiu
- Worked on large language models plus computer networking.

Publications

RetroV2X: A New V2X Paradigm with Visible Light Backscatter Networking

Fundamental Research

CHENREN XU, **KENUO XU**, LILEI FENG, BO LIANG

2023

- A practical vehicle-to-everything communication system with visible light.

When Visible Light (Backscatter) Communication Meets Neuromorphic Cameras in V2X

ACM HotMobile

KENUO XU, KEXING ZHOU, CHENGXUAN ZHU, SHANGHANG ZHANG, BOXIN SHI, XIAOQIANG LI, TIEJUN HUANG, CHENREN XU

2023

- When VLC meets neuromorphic cameras: a spike cameras as VLC receiver achieves 4.8 kbps data rate and different mobile scenarios.

Low-Latency Visible Light Backscatter Networking with RetroMUMIMO

ACM SenSys

KENUO XU, CHEN GONG, BO LIANG, YUE WU, BOYA DI, LINGYANG SONG, CHENREN XU

2022

- Enables 8 concurrent VLBC links and reduces networking latency by 92.0%.

VLID: Visible Light Backscatter System for Battery-free Internet-of-Things

IEEE/ACM Transactions on

Networking

CHENREN XU, PURUI WANG, TUOCHAO CHEN, YUE WU, **KENUO XU**, XIEYANG XU, YANG SHEN, JUNRUI YANG, GUOJUN CHEN,

GUOBIN SHEN

Accepted

- An end-to-end VLBC solution for battery-free IoT networking.

Renovating road signs for infrastructure-to-vehicle networking: a visible light backscatter communication and networking approach

ACM MobiCom

PURUI WANG, LILEI FENG, GUOJUN CHEN, CHENREN XU, YUE WU, **KENUO XU**, GUOBIN SHEN, KUNTAI DU, GANG HUANG,

XUANZHE LIU

2020

- Enhance the reliability of autonomous driving with reflective roads signs that conveys dynamic additional information.

Turboboosting Visible Light Backscatter Communication

ACM SIGCOMM

YUE WU, PURUI WANG, **KENUO XU**, LILEI FENG, CHENREN XU

2020

- Improve the data rate of VLBC by 8x (prototype) and 32x (simulation) with advanced modulation schemes.

Honors & Awards

2022 **Merit Student**, Peking University

Beijing, China

2021 **First Prize**, Competition of Future Network Technology Innovation

Nanjing, China

2020 **Excellent Graduate**, Peking University

Beijing, China

2019 **Houston BAA Scholarship**, Peking University

Beijing, China

2019 **Merit Student**, Peking University

Beijing, China

Activities

Teaching Assistant

COMPUTER NETWORKS (HONOR TRACK)

- Organizing the course and answering questions.
- Giving assignments, tutorials, and grading of labs.
- Designing quizzes and grading students' responses.
- Mentoring course research projects (light).

Peking University

Fall 2019, 2020, 2021(Light), 2022(Light)

Journal Reviewer

PROCEEDINGS OF THE ACM ON INTERACTIVE, MOBILE, WEARABLE AND UBIQUITOUS TECHNOLOGIES (IMWUT)

2021
